OM is the King
Uttering OM, regain your kingdom.
Be a king and move in the King’s Way.
The King’s Way in you is the Path of Breath.
That is, from the nostrils to the Brow Centre,
from the Brow Centre to the windpipe, to the lungs.
Move consciously in the King Way
and regain the throne which is located in your heart.
The movement in the King’s Way is not possible
unless the way is clear and clean.
Keep therefore the respiratory organs clean,
and walk through the Path experiencing OM.
May you proceed to experience yourself as OM, the King.

K. Parvathi Kumar
Meditation is the basis for all inner growth. The silent growth of the Soul happens in moments of silence. It is the means through which consciousness (or the self) is realised. It bridges the Self and the non-self and the work is thus accomplished. There are many kinds of meditation. The following is a proposal for a simple meditation structure suited for the present age.

**Time**

Select a time for meditation and adhere to it strictly. Time holds the key to success. It is more so in occult practises. Honour time, then time honours you. You should be able to meditate daily, at the same point of time. 6:00 a.m. and 6:00 p.m. are recommended as the appropriate points of time. For those to whom it is not possible, they can start by sitting regularly at any other fixed time in the morning and evening with a gap of 12 hours. Any time between 4:00 and 8:00 in the morning and in the evening may be chosen to start with.

The duration for meditation can prolong, but the commencement shall have to be at the same point of time daily. Two hours before dawn is considered to be most propitious for meditation. The twilight hours are also considered very beneficial. The full moon, the new moon and the eighth moon phase are specially suitable for meditation. The equinox and solstice days are equally important. Avail these days for meditational purposes.

**Preparation**

Arising in the morning, you should brush your teeth, clear your bowels, have a bath and wear fresh clothes. This process ensures that you feel light, fresh and pure of body.

**Posture**

Sit with your eyes gently closed, facing North or East, on a mattress or a chair. “Any comfortable posture”, it is said. Not everyone can sit in a cross-legged position. If the posture causes any pain, the mind will be thinking only of that and it cannot move beyond the physical, and the energies cannot flow through. As far as possible sit with your vertebra vertical to the horizontal, for the spiritual practice enables you to rise vertically.

**OM**

Utter OM thrice in a deep, slow, soft and uniform manner and listen to your own utterance. Remain silent for a minute. Listen to the point of emergence of the sound while uttering. Only by observing this point we can turn inward. If we listen further, we find OM as a continuous and eternal happening within. Going out through the mind and the senses is the opposite of meditation. If you utter OM mechanically, you do not even remember as to how many times you have uttered.
Therefore, utter OM consciously. Listen to it and find the source of utterance while uttering.

**Visualising**

**Imagine a brilliant golden lotus in your heart centre.** Feel that the lotus blooms at your every utterance of OM. Thus, after 3 or 7 utterances, you would see a fully unfolded heart lotus. Visualise the Master as being seated at the centre of the lotus. Visualise further that the Master is looking into your eyes, with a smile and with a blessing gesture.

**Invocation**

Utter forth the following, visualising the Master:

- Namaskarams Master CVV
- Namaskarams Master CVV
- Namaskarams Master CVV to your Lotus Feet

**The sound key** given by the Master for becoming a channel to the Energies of Synthesis is “Namaskarams Master CVV”. He also added that one need not repeat this many times as a mantra. It is enough if the sound key CVV is invoked once in the morning and once in the evening.

**Thereafter remain silent for 15 minutes.** The Master said it takes at least 15 minutes for the energy to spread to all the nooks and corners of the body. The static energy becomes dynamic with the sound key CVV. The movement happens in the body along the spinal column. Necessary adjustments happen in the body. Blockages and congestions are cleared for free flow of energies. Rectifications are conducted. The functional system is developed and coordinated for flow of prana. The Master calls all this as “repair work”. The morning and the evening invocations are understood as “parking the vehicle for repair”. Master CVV emphatically expressed that the human body as is now structured is unfit for complete life experience. The “spiritual” cannot be experienced unless its model is changed. He therefore proposes rectification and development of the models to experience the spirit.

**Observing Within**

After invoking the sound key, observe what is happening within, while you remain silent. What happens? Many things happen according to our experience. The common happening which we will notice is the process of inhalation and exhalation. Since we are born with this, we take this for granted and normally we hardly notice this. As we observe the process of inhalation and exhalation, the mind slowly becomes inwardly inquisitive and through the process, goes to the point of its emergence. Then, the aura of the heart centre, the seat of life will be perceived. The magnetism of the heart centre gets absorbed into that centre. We become
higher conscious and continue to observe as ourselves but not as our mind. The retreat of mind into the heart centre inaugurates many processes of change to the bodies - mental, emotional and physical. The processes are of repair, rectification and restructuring. To make fit the body to experience the pervading consciousness is the goal. The Supra-Consciousness descends into the mind and even further into the grosser plane to turn the man into a Master - an immortal, divine one. Master CVV calls this as “physical immortality.”

The inward turn of mind towards its centre is called “Dip Deep” by the Master. As we dip in, the mind meets its counterpart, i.e., the respiration. As the two draw near, they both disappear into one and that is pulsation. The pulsating consciousness only remains, while mind and respiration cease. It is difficult to give a complete expression to this in language. It is a state of stillness, where the heart beat stops, but you are not dead. This entire process can be summarised into three points: * Observe time in the morning and evening * Invoke the sound key * Observe within.

Anyone belonging to any faith, living in any part of the planet can work with this process and derive the benefit, i.e. getting the understanding of synthesis. The Master said that anyone who practices this for five years will acquire the ability to include, accept and integrate. His outer life will be organised and synthesised with the inner life and glimpses of harmony will usher into his life.

The Master also mentioned that one who practices this regularly for 10 years will become his channel. He gave two more regulations for one to become his channel:

- Meditate upon every form as the Master. (The Master means the background consciousness of all that IS. One has therefore to see Him in all the forms. For that, one has to know that all forms are divine and are manifestations of the one Life. This practice neutralises many angularities within us.)

- You shall not work for your gains. (The truth is no one is really working for his profit. We entertain a feeling that we are working for our profit, but in truth, we are only working for others. When we are buying anything, we feel that we are buying it for us. But we are paying the persons who produced the things that we purchase. One can expand this concept easily. The message is that everyone has to work for the other. The Master wants us to orient more and more to that part of our work which is meant to be done for the other.)
1.3  **This is the Path of Yoga¹:**

- From Paramatman to Atma
- From Atma to Buddhi
- From Buddhi to Manas

1.4  **Working with Occult Meditations**

Working with them enables psychological adjustments, which would lead to occult experiences. They would ultimately lead to experiencing the Divine.

These are the meditations given to Master EK by those whom he followed (Hierarchy) to those who follow him. These meditations are global in their concept. The sublime spiritual concepts and symbols of various theologies are found therein.

Everyday in the morning, the student is advised to study a meditation relating to that day and to contemplate upon its thought.

Such contemplation would enable the adjustment of the psyche and the awakening of the related intelligence (*Deva*) in him. Master CVV, from whom these meditations emanate, presides over said adjustments.

The student is well advised to read the meditation of the day, study it, comprehend it to the extent possible and contemplate upon such comprehension with devotion and dedication. The student is also advised not to look into the next day’s meditation. Such curiosity is to be avoided.

Stay in contemplation for fifteen minutes. Whatever is visualised or experienced may be written in a notebook with a notation of time, date and place. Slowly, these

experiences unfold the awareness, which is otherwise conditioned. The symbols, numbers, colours of the meditation would unfold the cosmic, solar and planetary intelligences in the student.

**Ninety-three are the meditations that are spread between an equinox and a solstice.** From solstice to equinox they are to be worked in reverse order. The student is advised to commence from an equinox and conduct one year cycle. When a sincere student conducts thus for seven years, the unfoldment is prophesied.

**The student of Yoga or occultism is not timesly predominated by mind, objective.** It needs to turn subjective. These meditations have the ability to turn the mind subjective and give the subjective experience. Within man is the universe; around man is the universe. To experience the universe around, the key is to experience the universe within. This is the age-old method of experiencing the Truth.

**Last but not the least,** it is strongly advised to do the meditations in English. For comprehension, they may be translated into other languages. But the potency of the meditation is hidden in the sound, which is given in English.

The Scriptures define man and woman from the standpoint of giving and receiving. They do not identify the man and the woman by their physical appearance. Giver is man; receiver is woman. The former habit leads to liberation; the latter habit leads to limitation.

**Sun is giver of life. Moon is receiver.** Sun is therefore man; Moon is woman. The Moon wanes and waxes. The Sun does not. The one who lives in higher centres is stable. He does not totter. The one who lives in lower centres is unstable, shaky. He totters.

The disciple should note this phenomenon of nature and learn to be a giver.²

1.4.1  Occult Meditation 1

Remember the giver.
He gave this frame.
You are the book.
I Am the one copy in existence.
I Am copied from the parent manuscript.

Commentary:
There is only one Giver. The whole creation emerges from Him. Verily the Giver is neither he nor she, because he or she also comes from the Giver. The nature, the consciousness, the force, the time, the place, the sound, the colour and the shape are the Giver’s emergence. The content of the soul is the Giver only. Verily it is the Giver who exists as all this. All are the Giver’s copies. The Giver is the only original. The Giver exists as I AM in all. The copies also exist as several I AMs. The copies are copied from the original. That original, that Giver, is called IT or THAT or Brahman in the Vedas and in the Upanishads. The Brahman, the Giver, should be remembered, be recollected and cannot be forgotten by a true disciple. May the Brahman, the basis of all, be meditated as the basis of the meditator. This is the first step towards realizing all other Occult Meditations and is the final step to be realised as well.

“I AM THAT I AM” and “I AM the Way” are the fundamental statements relating to the original I AM. When the Original is realised, the duplicate dissolves into the Original. The Veda calls this state Aham Brahmasmi or more appropriately, Brahma Ahamasmi, meaning, “THAT I AM”.

1.4.2  Occult Meditation 20

To whose temple the arch is starlit,
in whose temple the sun is the image of God,
to whose temple the moon goes every month
and brings the message out every full moon,
and whose message the moon sings
as a word of sixteen letters.
HIS religion I belong to,
HIS temple I visit,
HIS name I utter,
HIS glory I live in.
To HIM I offer the lotus of my day,
to HIM I offer the lotus of my night.

Commentary:
This is the most ancient meditation. Before the advent of religions, Sun worship was very common in all the four corners of the globe. Sun was worshiped as God. Constellations with planets and stars were considered as temple. Sun was seen as the image of God. The God was the invisible energy behind, while the Sun was His manifest form.

The student should meditate at the Sun ball in the Ajna centre, seeing the Sun ball as a lens transmitting energies from beyond. The Moon with its sixteen phases moves around the Sun in the month bringing the message of sixteen letters.

The fourteen ascending and descending Moon phases, the New Moon and the Full Moon constitute the sixteen letters of a message which the Moon brings from the Sun every month on the Full Moon day. This sixteen-lettered Mantra was helpful for the student to reach the Sun.

The only religion of the ancient man was to worship the Sun and to live by the message of the Moon and visiting such a temple, as Sun was the main goal. The temple was visualised as one’s own body and the Sun was visualised as I AM by the student of meditations. The I AM in the Sun, the I AM in the meditator and the I AM beyond the Sun are one and the same. The name of the Lord that the meditator uttered was I AM. Other names to God were secondary names. I AM is the name of the Lord. Such was the understanding.

‘I AM’ the student worships:
‘I AM the Lord’ via ‘I AM the Sun’, such was the religion. The student is expected to recollect God as I AM in him and in the surroundings and to experience the glory of the Lord I AM. The consciousness is filled with the Lord I AM. The three Logoi, the cosmic intelligences and the solar and planetary intelligences are filled with the Lord I AM. It is verily I AM that exists as every name and form and as every day and night.

Live the day and the night as an offering to I AM, experiencing the I AM in you and in the surroundings. This is an ancient meditation relating to I AM.
1.4.3 Occult Meditation 25

In HIS name we live,
in HIS temple we live,
in HIM verily we live until HE opens HIS eye in us.
In HIS name HE lives,
in HIS temple HE lives,
in HIM verily HE lives, as HE opens HIS eye in us.
In the meanwhile let us wait,
Let us look to HIM and not to each other.
Let us call HIM in all to find all in HIM.
Then the life is a car festival and not a war festival.

Commentary:
This is the most wonderful meditation that one can ever think of. It is the ultimate of the messages given by Lord Krishna composed into a meditation. This one meditation fulfils the disciple and transforms him into Him.

In His name we live. In His temple we live. The temple is the human body. We live in it. All that constitutes the creation and the body comes from the Divine. The life, the awareness, the will, the love, the light, the mind, the five senses and the five elements relating to the body and relating to the creation come from the Divine only.

Many times we say, “My body, my mind, my life, my intelligence.” None of these is fabricated by us. We just use them. Just like a rich man’s son uses his father’s property, we all use the Father’s property as ours. When the son uses the father’s property, the father has no objection. He would even tell his son that all the property was developed by him only to be enjoyed by his son. But we get accustomed to use the property and we start feeling that it is ours. Nothing relating to our body is ours. All is given and hence it can be taken through time. Only the experience remains with us.
In His name we live. The name of God is I AM. Also, each one of us says, “I am.” We use His name and we think it is our name. We live in His temple and we feel it is ours. We are forgetful people. While our very living is not our living, we feel we live. If we are the one who decided to live, we should live in the body as long as we wish. In fact, He is the Original and we are His reflections. When the Original decides to live in a body, we, the reflection, also live in the body. When the Original decides to leave the body, the reflection also leaves. We are just His reflections. He is the Original. He reflects in many bodies, in many ways. Know that the reflections have no independent existence and know that our existence is verily His existence.

Only until He opens His eye in us, we live in the illusion of our name, our form and our life. Once He opens His eye in us, we realise that in His name He lives. In His temple He lives. And in Him verily He lives. When the Lord opens His eye in us, there is no more illusion, there is no more reflection. Then the Truth is realised. The phantom of the self dissolves into the Self. The phantom is the false identity. It develops a false personality. It has no existence. It is a mere reflection.

Until this realisation happens, what are we to do? Until the illusion is cast off by the grace of the Lord, what are we to do? Should we suffer the illusion, the ignorance and the related pain? Not necessarily so. We can keep trying to see Him when we see each other. Let us listen to Him also as we listen to each other. This is a joyful play and we are bound to fail again and again. But it does not matter. Let us keep trying to see Him also when we see each other; let us listen to Him also as we listen to each other. Then life becomes a joyful movement, a festive movement like a car festival. Otherwise, life becomes a war festival.

There is a statement in the meditation advising us to wait. Waiting is a quality that is very important for discipleship. The ability to wait is linked to the ability to receive. In life, there is a dimension of reception. Life offers through time and we receive. People who cannot wait miss to receive what life offers. After every act, there needs to be waiting before a further act. This waiting is a pause that gives poise. Poise enables to receive. Movement and poise are the two wings of a rhythmic life. Poise comes through pause.

VI Invocation in the morning

From the point of light within the mind of God,
let light stream forth into the minds of men.
Let light descend on Earth.

From the point of love within the heart of God,
let love stream forth into the hearts of men.
May the Lord return to Earth.

From the centre, where the will of God is known,
let purpose guide the little wills of men, the purpose,
which the Masters know and serve.

From the centre which we call the race of men,
let the plan of love and light work out, and may it seal the door where evil dwells.

From the Avatâr of Synthesis, who is around,
let his energy pour down in all kingdoms.
May he lift up the Earth to the kings of beauty.

Let light and love and power restore the plan on Earth.

VII Invocation in the evening

May the light in me be the light before me.
May I learn to see it in all.
May the sound I utter reveal the light in me.
May I listen to it while others speak.

May the silence in and around me present itself,
the silence which we break every moment.
May it fill the darkness of noise we do,
and convert it into the light of our background.

Let virtue be the strength of my intelligence.
Let realisation be my attainment.
Let my purpose shape into the purpose of our Earth.
Let my plan be an epitome of the divine plan.

May we speak the silence without breaking it.
May we live in the awareness of the background.
May we transact light in terms of joy.
May we be worthy to find place in the eternal kingdom. OM

1.6.2 New Moon Meditation

OM (21 times)

The Pledge

We the humanity perceive the simultaneous double movement in Synthesis.

We the humanity accept dissolution of the undesirable and thereby its elimination.

We the humanity invoke simultaneously percolation of the Energy of Synthesis into the Governments of the world.

We the humanity invoke from the subtle to the gross immaculate concept of governing the world and expel from the gross to subtle the divisive forces.

We the humanity join with heart and soul the Hierarchy in building the New World Order.

Let the three Dêvas of Light, Love and Power restore the plan on Earth.

OM Šânti Šânti Šântihi
1.6.3 New Moon Mantram

*(Can be sung in multiples of 5)*

OM Nama Sivâya ¹⁰

This mantram relates to the Cosmic Will. It generates the Will-Divine (Goodwill) in us. In this mantram, Siva, the Cosmic Will, is addressed to bestow His Presence and His blessings.

Commentary on the Pledge

This is a pledge of the groups of good will to be ready for transformation. We declare that we are ready to cooperate in accordance with the Plan of Hierarchy to dissolve the undesirable and to receive what is desirable.

It is recommended to utter this pledge at new moon individually or in groups. Each approach to the new moon means dissolving the present and developing something new. We are in a very critical time. If interested, we can make this contribution of good will.

Our contribution might be like a grain of sand but even this grain of sand is accepted. We should not expect that we can do more than this. We should face the facts, remain humble and not assume greater dimensions of our work. When we build a good thought on the mental plane, it will find its own way of expression.

The symbol of synthesis shows a circle which is open downwards. There is a V indicating the descent of the energy from out of the circle. The tip of the second V is pointing upwards and is also embedded in the circle. These two movements - one directed downwards, the other directed upwards - were received as the downpour of the energy of the Avatar of Synthesis. One movement can be seen as the downpour of the Energy of Synthesis, the other as the lifting-up of the humanity. The double movement refers to this.

¹¹ Mystic Mantrams and Master CVV by Dr. Ekkirala Krishnamacharya
1.6.5 Exercise for Friday evening

Friday evening, we relate to the one eye which is between the two pillars. From ancient most time we are recommended to put candles on either side of a picture of a deity, two candles because in between the light of the two candles, there you stand a chance of visualizing what you want to visualize. Don’t keep anything in between. What is important is to relate to the lighted field in between. This we can do better when there is darkness in the rest of the room. It is a practice to relate to the subtle.

We are all attempting to see forms and relating to the forms, but we speak of the interlude within. The science of interlude has been a ritual from ancient most times. To relate in between the two ears there is a higher listening. To listen from higher circles. Likewise in between the two eyes there is the third eye conducting the higher vision. In between inhalation and exhalation there is the interlude. The golden middle principle is important; through it you can make entrance into higher circles and lower circles. We can relate upto the Ajna from between the left and right. The rod of power of the yogis is in the vertebral column, it is also related to the cerebro-spinal system. This is truly the temple. In that temple we recognise three light.

One is the centre of Ajna, the second the centre of heart, the third is the base centre. They shall have to be visualized. Close your eyes and visualize the Ajna, the most brilliant light. There is the symbol with the circle with the central point. It is not the brilliant light of the diamond but also the tinge of blue. Unless you think of blue in the diamond the diamond is considered not to be of value. The Ajna contains that light which is called the sky blue. If you keep on observing the circle with the central point is the first step. To be in Ajna is our original seat we have abandoned. Like a king who has gone into the forests and is not on his throne.

In the heart centre you can visualize a circle with a cross within. That is how the heart centre with golden yellow light has to be related to.

Then the base centre, it is not to be meditated upon on the path of Raja Yoga.

You can do a kind of visualization with blue from the head and golden light in the heart and light down to the base centre, not contemplation on the base centre. No teacher on the Raja Yoga path recommends contemplating in the centres below the diaphragm.

There is a centre to be contemplated on Friday evenings, between the two eyes and between the centripetal and centrifugal pulsations of the heart. In the interlude you can feel the pulsation. It has centripetal and centrifugal activity and you can relate to the interlude.

---

12 From the group life on the „Incoming Seventh Ray and Building the Temple“, Master Kumar, Billerbeck, Germany, 30 June 2017
Link up the blue on the forehead, the golden yellow in the heart. You can relate from the golden yellow to aquamarine in the throat and then to blue in the head centre. Then the light can go to the base centre. The Ajna, the heart and the base centre, these are of great importance. Creativity is possible when one is linked to the higher circles.

From the Ajna you can link to the higher circles. To all of us the program comes from the personality to fulfil the personality purposes but not of the soul. But the soul that sits on the throne of the Ajna it receives from the crown, the coronation. This is connecting to the higher centres. When you are coroneted you keep something on the head. Every Master of Wisdom has a crown as much as a king. A king may not be an initiate. Jesus said, I am the king of kings. The crown is there but not seen. First you sit on the throne, later you have the crown. There is a diamond throne in the Ajna.

If the higher energies feel that you are rhythmic, consistent, the devas feel that you are regular, rhythmic, then the higher circles relate to you. One should contemplate at fix hours, the intelligences, the angels, can take interest in you because you are reliable. For such ones the contact is possible. The contact is the throne.

From the crown to the throne and from the throne every king has a rod of power, the staff of an initiate. The rod of Moses. Every initiate has a rod. You may not see it but it is there. It is Aaron’s rod, it is nothing but the realised Sushumna in him through which every magic can be done.

First of all, meditate on the bluish white colour. Through tradition sapphires have come to be but you don’t need. Relate to Ajna, relate to the heart, the pulsating principle and the interlude. Consciously connect. The first is Ajna, the creative light; the second is the preserving light. The heart preserves your system. That is why we are told to meditate on the principle of Sun in the Ajna and the principle of Venus in the heart. In the basis is the procreative centre, where you recreate what is created in the Ajna, for manifestation on the planet.

So relate to Ajna, to heart, with the related colours, it has already been given in the books of the teachings. As above we receive and conceive and deliberate upon action; that is how the plan is manifested on earth. The seers bring out the plan, in tune with it we keep manifesting. The first is the creative light, the second the preserving light and the third the procreative light. To bring down in tune with the ancient order but not with what you wish to.

Your contribution with goodwill also elevates you and you go up to the higher centre. Between Ajna and brow centre you work with receiving the plan. Preserve that plan in you and try to manifest. There is the centre of synthesis or second ray. To receive you need a fetimese energy or ray. You are receiving into the Ajna centre, it is second ray for receiving and first ray for manifesting. Heart is in tune with the higher centres when serving the plan but in conflict when you relate to personality. More and more you attune to the light of the soul, the personality crises get resolved. The personality has a tremendous ability of producing personality problems. Even if there is no problem you
create problems. When a Master of Wisdom was asked, what is the problem of humanity, he said, it is the human mind. You always think in terms of no problem when there is a problem. When someone says there is no problem, there is the fear of a problem in you relating to personality and you say, there is no problem.

**From the higher circles the heart expresses in harmony** and you express from blue, golden yellow and the heart is the centre of Vishnu, the base centre is Brahma, the Ajna is related to Shiva. Brahma created when he received a thought but he is not the creator. The energies from higher circles enable manifestation for manifestation. First Logos applies to will, second logos to love and third logos to activity.

**The three centres you relate to on a daily basis but don’t focus on the base centre.** So the diamond light gradually goes to the golden light and then rose to orange, then to violet in the higher base centre. We slowly develop the subjective mind by regular contemplation in your central column. We develop the subjective side of mind, to easily relate within. There has to be very regular practice for a fairly good duration. As we wake up until we get to sleep, so much objectivity prevails; it is not easy to get into subjectivity until you go to sleep. Relate to subjectivity.

**It is not a worship exercise but an exercise for inner awareness.** If you open the books of Master DK he says 5 times relating for the occidentals and three times for the Orientals. This means occidentals are those relating to the matter, if you are oriented to the inner, it is oriental. It is a way to contemplate, a first one on the bed, a second around 6 o’clock, then around noon time, then around 6 pm and then before you go to bed. If you are not able to visualize the light in you; you have to more often visualize in you and utter OM. With one prolonged OM all centres become lotuses. The moment you utter OM everything opens in the inner side of your being. Visualize with your subjective mind to regularly visualize. Engage in the light of the soul. The objective mind leads you outside.

**In the east they recommend when you slip into objective life to utter once again OM.** Or some say, Master Namaskarams. You will slowly gain the necessary strength to relate inside. For a true student of wisdom no other thing is important than contemplation. He can sit for hours like a cooked potato. You sit like a cabbage. When you turn inward the comfort is so high. When there is comfort... you should gain the comfort to stay within and another light gets developed which takes care of your vital system. You vital body gains various strengths. We are not disturbing the personality through the work in the objective world. The vitality is reduced by your relating to the objective life where there is not much harmony but conflict. When objective mind turns subjective, you are at peace with you and you don’t go through so many vacillations. Your body is filled with magnetic life energy. You are resistant to acute diseases. You don’t get so many diseases; your vital body gets revitalized through your contemplations.
Chapter 2 Prayers and Invocations

2.1 Prayers

Prayers are inevitable on the Path. They are helpful to orientate to the Divine. Prayers do good to the beginners, the aspirants and to the adepts, to men and to Masters as well.

Prayers do not belong to the mind, they belong to the heart. They are the cry of the Soul, if they are ardent and hearty. They develop cordiality and establish a cordial link to the Divine. A cordial link is considered the best. The Divine too finds the way to reach us through such cordial link.

Ardent prayers culminate into true meditation. It enables musing of the soul with the super soul.

The prayers show the profound love and longing for God. Every stanza of the prayers is by itself whole and entire. It leads to Synthesis. Through the dip deep of these Prayers ultimately one will merge into the One and unite with God.

The prayers directly lead and rise up to higher levels, and the heart and the soul are touched and magnetised. It is like listening to the holy Music of the Soul. If we devote our time with an open heart, humbly and in adoration, we will be allowed to enter into the lightful and magnetic field experiencing the blissful energy of the prayers.

2.1.3  Prayer of Good Will in Action

May we express Good Will in action.
May we unfold the power to manifest.
May we enter the world for the Lord.
May we stay united in all ways.
2.1.4 Prayer before eating

I invoke the Lord to purify within and outside me,

purify the place and purify the food

I offer to the body.

May the Lord protect me, the food, the body

and the place through this act of mine.

Comment:

It is recommended that we eat in a clean and serene place, where silence and purity prevails. We should not eat on pathways, in moving buses and in underground trains. Unless inevitable, we should eat only in quiet places. Eating in busy centres, bars, restaurants and in places of noise and hubbub should be avoided. Wherever you eat, consecrate the place through a mental proposition and eat.

2.1.5 Offering the Food to the Lord of Fire

I am thankful to the Lord for the food made available.

I offer this food to the Lord of Fire,

For his distribution to the Dêvas within the body.

May the Lord be pleased.

May the Dêvas be pleased with this act of mine.

Comment:

It is recommended that we eat in a clean and serene place, where silence and purity prevails. We should not eat on pathways, in moving buses and in underground trains. Unless inevitable, we should eat only in quiet places. Eating in busy centres, bars, restaurants and in places of noise and hubbub should be avoided. Wherever you eat, consecrate the place through a mental proposition and eat.

When you eat food, the heat in your body arranges for assimilation of the food and its distribution to the body as energy. It is the work of Fire within the body. Hence
the offering of food should be to the fire in you. Offer the food to the Fire and eat with quietude. Even if you are pleasantly engaged in talk, do not forget your offering to the Fire. Silence while eating enables you to maintain the sense of offering. But when you gain familiarity, you can even engage in pleasant talk with those around, while maintaining the sense of offering. Consecrate the food through such offering.

2.1.6 Offering Food to God: Brahma Arpanam

Brahma Arpanam Brahma Havir
The act of offering is God, the oblation is God.

Brahmagnau Brahmanaahutam
By God it is offered into the Fire of God.

Brahmaiva Tena Ghantavyam
God is That which is to be attained by him.

Brahmakarma Samadhina
Who performs action pertaining to God.

Aham Vaishvanaro Bhutva

Praninaam Dehamaashritaha
Becoming the life-fire in the bodies of living beings,

Pranapana Samayuktah
mingling with the subtle breaths,

Pachaamyannam Chaturvidham
I digest the four kinds of food.

Bhagavad Gita, Chap. IV, verse 24,
Bhagavad Gita, Chap. XV, verse 14.

Comment:

The whole food is seen as Brahman because the Brahman himself has transformed into food so that he feeds the beings who are no other than Brahman - just like we grow vegetables and we eat them! The Brahman creates food and he nourishes the beings with the food. Brahman is food. The food is no different from Brahman and you are not different from Brahman. The fire in you is also Brahman. The Brahman is offered to Brahman via the Brahman. And all is Brahman.

“Brahmarpanam” meaning I offer to the Brahman. “Brahma Havir” meaning that which we offer is also Brahman. “Brahmata” meaning you are also Brahman. So that activity is all Brahman’s activity for Brahman. These two stanzas are normally spoken every day when we take food; we are supposed to read them with understanding and then eat.

2.1.7 Prayer for Group Coherence

Sahanaubhunaktu
May we share and enjoy together.

May we work efficiently together.

Tejaswi Nâva Dhita Mastu
Let there be no hindrances to our enlightenment.

Mâ Vidvishâvahai
Let not malice prevail.

Om Sânti Sânti Sântihi
OM Let peace be in all the three planes.

Explanation:

This is a “teacher-student” invocation for the mutual benefit, blessings and growth. The benediction is uttered to ensure togetherness in the Path of Light. The unique feature is that “may not malice prevail between us”. The Peace Chant enables the establishment of cordiality and the removal of all ill-feelings. The invocation also spells out clearing the purpose of the Teacher-student relation. It is undoubtedly for the accomplishment of enlightenment.

The teacher is the enlightened One. The student is the seeker of such enlightenment. The student is therefore one whose single objective is enlightenment. To grow in Light is declared as their mutual purpose. For that single purpose, they work together.

The work is defined as the work of goodwill, of service, of welfare to life. Such work gives joy. Such joy is also to be shared together. When the two thus work in Light and for Life, when malice prevails not and peace exists, protection of them is ensured.

Such is the noble invocation, recommended to be uttered by the Goodwill groups, relating to themselves and to their teacher.

2.2.7 Invocation texts for Sunday

OM (7 times)
From the point of light within the mind of God,
Let light stream forth into the minds of men.
Let light descend on Earth.

From the point of love within the heart of God,
let love stream forth into the hearts of men.
May the Lord return to Earth.

“From the center, where the will of God is known,
let purpose guide the little wills of governments,
the purpose, which the Masters know and serve.” 3 times
From the center which we call the race of men,
let the plan of love and light work out,
and may it seal the door where evil dwells.

From the Avatâr of Synthesis, who is around,
let his energy pour down in all kingdoms.
May he lift up the Earth to the kings of beauty.

The sons of men are one, and I am one with them.
I seek to love, not hate.
I seek to serve, and not exact due service.
I seek to heal, not hurt.

Let pain bring due reward of light and love.
Let the soul control the outer form and life and all events
and bring to light the love that underlies the happenings of the time.

Let vision come and insight.
Let the future stand revealed.
Let inner union demonstrate and outer cleavages be gone.
Let love prevail. Let all men love.

Maitreyaya Namaha
Sukaya Namaha
Vyasaya Namaha
Naradaya Namaha
Para Brahmane Namaha

Explanation:

“Guru bhyo namaha” means salutation to my teacher; “Parama Guru bhyo namaha” means salutations to the teacher of my teacher; then “Parameshti Gurubhyo namaha” means salutation to the teacher of the teacher of the teacher. Three generations teachers are invoked and respected. Then, “Sapta Rishi bhyo namaha”. Sapta means seven. Seven Rishis, to them we salute. Then, we salute the Pole Star, Dhruva. Then, we salute the mind-born sons of Brahma: Sanaka, Sanandana, and Sanat Kumara. Like that, there is a Hierarchy. In the daily invocation we are strongly recommended to recognise the presence of the Seven Seers within our being in the seven centres, and also feel their existence on the planet in the land around the Pole. It is the Sacred Island. This practice would slowly enable us to establish a link with these grandest beings of the planet. The seven ashrams are basically their work.

3.2 Suktams and Rituals

3.2.1 Stanza 1 of the seven verses from the Book of Dzyan

1) The Eternal Parent, wrapped in her Ever - Invisible Robes, had slumbered once again for Seven Eternities.

2) Time was not, for it lay asleep in the Infinite Bosom of Duration.

3) Universal Mind was not, for there were no Ah-hi to contain it.

4) The Seven Ways to Bliss were not. The Great Causes of Misery were not, for there was no one to produce and get ensnared by them.

5) Darkness alone filled the Boundless All, for Father, Mother and Son were once more one, and the Son had not yet awakened for the new Wheel and his Pilgrimage thereon.
6) The Seven Sublime Lords and the Seven Truths had ceased to be, and the Universe, the Son of Necessity, was immersed in Paranishpanna, to be outbreathed by that which is, and yet is not. Naught was.

7) The Causes of Existence had been done away with; the Visible that was, and the Invisible that is, rested in Eternal Non-Being - the One Being.

8) Alone, the One Form of Existence stretched boundless, infinite, causeless in Dreamless Sleep; and Life pulsated unconscious in Universal Space, throughout that All-Presence, which is sensed by the Opened Eye of the Dangma.

Explanation:

We should read the first stanza of dzyan daily and then go to sleep. This is very helpful. First of all, we sing OM Namo NARAYANAYA, then read the 8 slokas of the first stanza and afterwards go to sleep. (We should not read the 9th sloka, because it is a question.) We should think about and it is sinking deep into our inner self.

Explanations from the Secret Doctrine:

Ah-hi: these are the collective hosts of spiritual beings -- the Angelic Hosts of Christianity, the Elohim and "Messengers" of the Jews -- who are the vehicle for the manifestation of the divine or universal thought and will. They are the Intelligent Forces of Nature's laws.

Paranishpanna: is the absolute perfection (paranirvana), to which all existences attain at the close of a great period of activity, or Maha-Manvantara, and in which they rest during the succeeding period of repose.
3.2.2 **Purusha Suktam**

3.2.3 **Peace and Healing Prayer**  
*(This can be spoken at the beginning or at the end of the Purusha Suktam and also daily before falling asleep.)*

Gatum Yagnâya Gatum Yagna Pataye  
May we have that peace to utter and chant the song of the sacrifice and also the song of the Lord of the all-sacrifice.

Daivê Swasti Râstu Naha  
May we have Divine welfare, the welfare bestowed upon us through the Devas. May welfare be with those who know.

as Sankalpa for the so-called future), all this verily is of the Purusha who is the Lord of Immortality. (Here the Jeeva born, the matter is made up of and the time he lives in, are described as the projection of the Immortal nature of Purusha because Purusha is the Lord of Immortality.)

This much is the splendour of Purusha. Yes! And greater He is than this. All these beings in the universe are one fourth of Him. The remaining three-fourths is in his immortality in (His one) brilliance. Here “this much splendour” refers to the splendour described in stanzas 1 and 2. The remaining portion of the stanza means that the definable or the manifest is only one fourth of the total personality. The remaining three-fourths belongs to his own brilliance which is eternal in Nature.

The Purusha has outgrown His three-fourths; His one fourth (which has grown out of the three-fourths) becomes all this world. It is then (in this one fourth) that He grows out into the many manifestations of the organic and the inorganic entities. (From the Purusha who is one-fourth in manifestation and three-fourth unmanifest and who is described in the last stanza) Virat is born. From Virat, Purusha is again born. Having been born, He (newly born Purusha) permeated the whole matter backwards, downwards and forwards (in all directions) and yet surpassed it. (Virat means the Lord Consciousness of the newly separated globe or universe.) He comes out in the form of mundane egg from the eternal Purusha. He is the consciousness of becoming who comes out from being.

Since the Gods magnified the offering (of creation) by the Cosmic person as oblation, the spring season was used as ghee for the offering, summer was the fuel and the Moon season was the matter of cereal grains for offering.

The creative Intelligences (who came out of the Cosmic Person) tied the same person as the sacrificial beast to expand the concept of Yagna (offering of Himself to serve as the creation and its content); seven are the layers (of existence) and three times seven are the sticks of fuel made.

The Devas manifest and unmanifest as well as the units of wisdom have sprinkled (the matter of) the first born Purusha for the

17) Dhata Purastad Yamudayahara Shakrah Pravidwan Pradishashcha
Sacraments has located as the fourfold principle by which He became a knower. One who knows Him thus becomes immortal. There is no second path to take a journey to Him.

The Gods offered the sacrifice Through sacrifice. The laws stood as the original laws to be followed. Before (creation) all the Devas were in a subtle state. Those great ones include as the laws of creation.

How it came to pass that this Lord came to exist in the universe? It is explained thus. He is born from the waters (germinating medium) and the essence of this earth (fertility) with the help of Himself as the Lord of all the deeds of the universe. Himself as Twastha (the one who etches and engraves) shaped Him into shapes. Before He came to exist in this universe, everything was in Him as His own awareness.

"I know this Purusha (person), this Great One, who is the Light of the Sun, shining beyond darkness." One who knows Him like this; becomes immortal. There is no other path for attainment.

The Lord of Reproduction moves inside the womb (of space). Though He has no birth, He is born into many forms' (like the space in many rooms). Those who perceive in tranquility, can perceive His birth place (as space). The Creator-consciousness always desires to attain the pedestal of the rays during their course of creation.

I bow down to the shining one, the manifestation of wisdom who shines forth as heat for the devas and who works as the preceptor of the devas. He is the one who is born first for the work of the devas.

In the beginning of the creation all the Devas generated the light, which was filling the self-expanding consciousness. Then they blessed: "To Him who knows you like this, to that knower of Brahman all the Devas will be under control."

Sense of shame towards shameful behaviour is a beloved of yours. The Goddess of Splendour is your second beloved. Night and day are your lateral divisions. The division of the space between your lips wide open. Accept my desire as your offering. Accept this (being as) my offering to you. Accept the all (that is in me) as my offering and excuse me.

**Explanation:**

The first three names are followed by the word "Swaha". Swaha means that we invite the Lord into our innermost.

We should imagine that the Lord with four arms is in us. We are the sheath, the dwelling place of the Lord. Then we should sing the 21 names we use to worship the Lord.

Three names serve to invoke, 21 names serve the worship of the Lord who dwells in us: from the place above the Sahasrara to below the Muladhara.
3.2.7 Fire Ritual 41

Explanation:

Dêvas

In the ritual through the Fire god the planetary, solar and cosmic Devas are invoked by their respective seed sounds and mantrams, the directional Devas are also invoked. Their blessings are sought as per the three steps of the prayer, namely

- Neutralisation of Karma.
- Visualisation of golden light.
- Experiencing the Truth.

This Fire ritual is therefore recommended for all truth seekers. The cooperation of Devas is essential for an aspirant and the disciple as well. The Devas are the helpers on the Path. Their worship is best done through Fire. The text reveals their detail.

Preparation for the Ritual

The Fire Ritual should be carried out during the dawn hours, because in the dawn hours the energies are uprising, and in the case of the dusk hours the energies are receding. That is why all prayers are beneficial only during the forenoon. For all rituals, one should necessarily take shower and wear fresh clothing and abstain from food until the ritual is over.

While doing the Fire Ritual one should face east. That is the first preference. The second preference is north. North is Silence and east is Light. North is the God Absolute, East is God as Light. Thus the arch between North and East is very auspicious. The middle point of north and east is north-east. That is the place where Existence becomes Awareness and we call it Ishana. It is the entry point of the Lord from his Absolute state into the state of Light. We keep the north-east corner of the house very, very sacred and auspicious. It is the place through which the Lord enters. Through east the Light enters. North-east is the Male-Female God. East is feminine, north is masculine. One can face either east or north or anywhere between North and East. The altar in the house shall have to be in this part of the house or in this part of the room. Even for prayers and meditations these directions are to be preferred.

Before we start with the Fire Ritual, we construct 7 layers of triangles, in a copper vessel, with 21 wooden sticks, chanting the hymns Purusha Sukta and Sri Sukta. After having constructed the 7 layers of triangles, we light the piece of camphor which we have placed in the centre of the triangles, with a lighted incense stick. At that time we chant 7 times a mantram inviting Lord Agni which is given in the text.

*Offering to the principle of Longevity and Auspiciousness.*

GAURI is the Principle that governs the life in forms. When worshipped bestows longevity. It is considered auspicious because it is untouched by desire. Desire regulation is important for this principle to bestow the blessings.

20) **OM Pratyam Girâya Swâhâ**

*Offering to the principle of Boomerang.*

PRATHYAM GIRÀ is the Cosmic Karmic Principle. As you sow, so you reap. Whatever one gets is solely due to whatever one did. The principle of Karma brings back and gives the experience of ones own speech and actions through time. If anyone does acts of ill-will to you it protects in so far as you do not reciprocate such act.

21) **OM Guru Devâya Swâhâ**

*Offering to the Master (the teacher).*

The teacher principle is one in the creation. It exists in every teacher that guides the souls to Truth.

3.2.8 Water Ritual (Rudra Abhishekam) 43 44

The recommended times for the ritual are given here under:

- Sunrise or sunset hours. Sunset hours are more important than even sunrise hours for the water ritual.
- Mondays stand in priority to all other days for the ritual. The order of preference is Monday, Sunday, Saturday and Thursday.
- New Moon days are of special importance for the ritual while Full Moons are also special days.
- The watery signs of the year viz. Cancer, Scorpio and Pisces are specially suited for this ritual. The month of Aquarius stands foremost as it relates to space ethers. The New Moon of Aquarius is annually the best day for the ritual.
- The thirteenth moon phase is as important as the New Moon, especially the thirteenth descending moon phase of Aquarius. Every thirteenth moon phase gains special importance if that moon phase falls on a Saturday.

*(Can be sung in multiples of 8)*

**OM Namo Nârâyanâya**  
*Narayana stands for the alpha and omega of the universe: The Vedic seers gained this four-lettered sound in their penances, found its significance and its meaning. They initiated the seekers into this mantra from ancient most times to enable self-realization and at-one-ment with Narayana.*

**Lokâ Samasthâ Sukhino Bhavantu** (3 times)  
*May all planes of creation be free from worry and in balance.*

**OM Šânti Šânti Šântihi**

4.5 Prayer for the Patient

Master, please rectify and develop the system of the patients to whom I offer the prayer.

Explanation:

Keep a blue color (sky blue color) notebook and note the date, the name of the patient and the detail of the sickness. Also when you meet people whom you don’t know, but who look suffering and sick, it is recommended to note details immediately. For this reason the notebook for healing meditation should be kept with us.

It is recommended to visit patients once a week. The Healing Meditation can be done on Thursdays or on 11th Moon phases.

4.7  Eleventh Moon Phase Prayer

The eleventh moon phase is considered to be most appropriate for relating to the divinity because there is a sextile aspect that happens between the Moon, the Sun, and the Earth by which you draw very congenial, harmonious, agreeable energies by which our system gets nourished. That is why as much as full moon is worked out by an aspirant, eleventh moon phase is also worked out.

Step 1: Utter forth "OM NAMO BHAGAVATHE VASUDEVAYA" 48, 3 times and visualise unfolding of the 3 outer layers of Anahata.

*Pause for three breaths*

Step 2: Again utter forth "OM NAMO BHAGAVATHE VASUDEVAYA", 3 times and visualise unfolding of the second set of three petals of Anahata.

*Pause for three breaths*

Step 3: Again utter forth "OM NAMO BHAGAVATHE VASUDEVAYA", 3 times visualising unfolding of 3 petals of Anahata of the third layer.

*Pause for three breaths*

Step 4: Likewise, utter forth "OM NAMO BHAGAVATHE VASUDEVAYA", 3 times and visualise the inner-most layer of three petals unfolding, flashing forth electrical blue from the centre.

Step 5: Contemplate upon the emerging blue for 15 Minutes.

Step 6: May the blue pervade from the centre to the circumference of the lotus, the colour gradually changing from electric blue to transparent honey to golden colour and to brilliant orange colour.

Step 7: Visualise that the golden yellow and orange colour are spreading all over oneself and spreading all around.

Let this be the healing prayer on the eleventh moon phases.

Chapter 5 Stanzas and Songs

5.1 Stanza of Initiation

(The Stanza of Initiation can be used whenever we kindle the candle.)

**Imam Vivaswathe Yogam**

*I, the Eternal One,

Proktavān Aham Avyayam.*

*initiated the Sun God, Vivaswatha.*

**Vivaswan Manave Praha.**

*The Sun God initiated the Manu, Vaivaswatha.*

**Manur Ikshvāka Vebraveet.**

*The Manu initiated the Solar King, Ikshvāku.*

**Word Meaning:**

- Imam: This
- Yogam: Yoga
- Vivaswathe: To the Sun God, Vivaswatha
- Aham: I
- Avyayam: The Eternal One
- Proktavān: Initiated
- Vivaswan: The Sun God Vivaswan
- Praha: Initiated
- Manave: The Manu
- Manur: The Manu (Vaivaswatha)
- Abraveet: Taught
- Ikshvāka: Ikshvāku, the Solar King on Earth

**Explanation:**

I, the Eternal One is the Pure Existence. The Sun God is the existence individualized as a Soul. The Soul is the weaver of life and is therefore called Vivaswan. The Soul’s mind is Buddhi — the light of the Sun. He is thus the Son of the Sun. He further weaves life and is therefore called Vaivaswatha. He initiates his son Ikshvaku, the Solar King, who represents the mind that rules the objectivity (the Earth).

49 https://worldteachertrust.org/_media/media/audio/stanza_initiation.mp3
The following table is to be comprehended:

1. Aham Avyayam
   *Pure Existence and Awareness. I Am the Eternal Paramatman.*

2. Vivaswan
   *Individualized existence and awareness. I am the individual Atman*

3. Manu
   *The Buddhi or the Mind of the Soul*

4. Ikshvaku
   *The Mind of the Body that rules the body (the earth)*

5.2 Sanat Kumara and Maitreya Mantrams

Samasta Yogī Janatārakam Tham.
Sanat Kumaram Saranam Prapadye. (2x)

Kripā Samudram Sugatasya Mitram
Tapascharantam Giriraja Pārsway. (2x)

Jagadgurum Sarva Mata Pradīpam
Namāmi Maitreyam Agādha Bodhām. (2x)

OM Shanti, Shanti, Shantihi

These slokas (mantrams) come from Vidyaranya Maharshi (1296 - 1391 CE), a very great initiate. You might sing them once in a week, maybe after fire ritual.

Explanation:

Sanat Kumara Mantra

Samasta Yogī Janatārakam Tham.
Sanat Kumaram Saranam Prapadye.

To all yogis, you are the liberating one. I walk into your fold of protection and guidance, so that I am completely protected, guided, elevated, and transformed. He is the community of all yogis; he has come down from beyond the planet. Oh Sanat Kumara, we surrender to you.

50 https://worldteachertrust.org/en/web/meditation/sanat_kumara_and_maitreya_mantrams
Maitreya Mantra

Kripā Samudram Sugatasya Mitram  
Tapascharantam Giriraja Pārsway.

An ocean of compassion, a friend of all those who want to walk the path of light. He is always in the highest state, between Ajna and Sahasrara, and transmits the Plan to the followers. He is residing beside the mount where the Lord lives. He has no preferences.

Jagadgurum Sarva Mata Pradīpam  
Namāmi Maitreyam Agādha Bodhām.

He is the World Teacher, Jagadguru. He uplifts every religion to the light. Namaskarams Maitreyam; it is impossible to understand his depth.

OM Shanti, Shanti, Shantihi

OM, Peace, Peace, Peace.

The work of Sanat Kumara will have to be more and more recollected and realized in us. By doing this and by speaking of Sanat Kumara and Sambala you are already doing great service according to the Masters of Wisdom.

Sanat Kumara has around him three great beings. The first and foremost of them is Lord Maitreya. The other is called Sugata or Tatagata, who is no different from Gautama the Buddha. The third one is Shankaracharya - very well known to the Indians but not much paid attention to. They constitute the first triangle around Sambala and Sanat Kumara. Around them there is the Hierarchy. We know some of the important members of the Hierarchy; we don’t know all the names of all those great beings that guide this humanity.

Lord Maitreya is the ageless one. He was already a great adept even before the advent of Lord Krishna. He was a chief disciple of Parasara. He is the one who attained the state of being the Friend of the Universe. Maitreya means, embodiment of friendliness.

Sanat Kumara is the one who can liberate all yogis - yogis, not you and me. Liberating us is the work of the Hierarchy. It is the will of the Hierarchy that they shall externalize themselves. The time for the externalization of the Hierarchy has come to be. How can they be externalized? We should get in touch with the existence of the Hierarchy and then make sure that from time to time we recollect them. When we do prayers in the morning and evening hours, we should necessarily think of Lord Maitreya to keep receiving his rays of grace.

Comment:

In Ganapati, the principles of all 3 Logos and their consorts are present. All the intelligences grace their presence through Ganapati. There are 16 + 2 names of Ganapati.

When Ganapati graces, our thought, speech, and action will be streamlined. We will get the right thought at the right time. When there is order in our life, there will be expansion in our consciousness. It is said that stability was established in Creation only after the descent of Ganapati into Creation.

That light which emits through Sun is the light in the cave of my heart.
I am that light.
I am verily that light.
Verily, verily it is that light which is in the sanctuary of my being.
I am no different from it.
I Am verily That.
That only exists as I Am.
My existence is no other than the existence of That.
That light is eternal.
I Am but a ray of That. I emerge from That, play around and eventually merge into That.
That I Am shall be my contemplation and attainment.
The WTT works under the direct guidance of

- **Master CVV (1868-1922),** who gave out the yoga path for the human perfection, and
- **Sri Mynampati Narasimham (Master MN, 1883-1940),** who was initiated into the yoga path by Master CVV in 1919, and who then initiated thousands of families into yogic life and liberated them from the bondage of karma through the process of yogic magnetisation.

The WTT is particularly inspired by the life and teachings of

- **Dr. Ekkirala Krishnamacharya (Master EK, 1926-1984),** who founded the WTT in 1971, and
- **Dr. K. Parvathi Kumar (Master KPK, born 1945),** the present Chairman (since 1984).

The WTT spreads their impersonal teachings. Multi-faceted wisdom flows through them, inspiring aspirants in the East and the West into a right way of living.
